The following is offered to better enable you to make an informed decision.

Protective Caskets: These caskets are designed by the manufacturer to resist the entrance of air, water and other outside elements. They may be constructed of varying gauges of steel, copper or bronze. **There is no scientific or other evidence that any casket with a sealing device will preserve human remains.**

Non-Protective Caskets: These caskets are not designed by the manufacturer to resist the entrance of air, water and other outside elements. They may be constructed of metal, hardwood or wood-product covered with fabric. A complete list will be provided at the funeral home.

Disclaimer of Warranty: The only warranty of the casket or any merchandise sold in connection with this service is the express written warranty, if any, granted by the manufacturer. **This funeral home makes no warranty, express or implied, including an implied warranty of merchantability and implied warranty of fitness for a particular purpose, with respect to the casket.**

If you want to arrange a direct cremation, you can use an alternative container. Alternative containers encase the body and can be made of materials like fiberboard or composition materials (with or without an outside covering).
